

WELCOME

to the Growtivation Product Guide for 2019/20. At Growtivation we've been doing even more to help our stockists increase their sales. With all distributors listed on the 'Where To Buy' page of our website and the introduction of 'how to' video installation guides, making it even easier for tradespeople to select quality products from our 'product that works' range. Please take some time to browse through our range of specialist products and don't hesitate to get in touch for further advice on what's the best choice for your store!

WHY GROWTIVATION?

For those readers that haven't yet undergone THE GROWTIVATION EXPERIENCE you may be wondering why Growtivation? An unusual name we'd agree... but that's not the only thing that makes us different.

At Growtivation we are passionate about growing your sales by motivating your customers to buy our products. Our sole aim is to provide 'product that works' for you for your customers and for us. The secret to growing sales lies in a perfect blend of trusted 'brands that sell' fully backed up with marketing support and a 'service that delivers'.

PRODUCT THAT WORKS

Motivated by our motto, we have always made every effort to supply 'product that works' for our customers and the end user. The hallmark of all our products is quality, performance and value for money. Stringent quality control procedures ensure that guaranteed quality products reach the end user and can be relied on to perform to the standards required. Our products provide solutions across a wide range of applications, falling into 3 main industry sectors; landscaping, building and growing.

BRANDS THAT SELL

At Growtivation we believe in the concept that it's not products that sell, it's 'brands that sell'. All our products have clear, individual branding which is particularly emphasised on the product packaging. Brand names are memorable and help to describe the product's applications, whilst making it easy for the end user to identify. What's more we have a comprehensive range of point of sale material and merchandising stands to help boost sales - see page 40 - 43 for options.

SERVICE THAT DELIVERS

Our service is a 'service that delivers' more, in every way. At Growtivation our customer support is second to none as all of our staff are prepared to go the extra mile. Your experience starts with a delivery of the right product to the right place at the right time.

Orders placed by 1pm are despatched the same day (subject to stock availability) and we can offer the option of a next day delivery at no extra cost, meaning you don't need to hold large stocks or miss sales opportunities by being out of stock.

TERMS & CONDITIONS

All orders placed with REG Group Ltd t/a Growtivation (referred to as "Growtivation") shall be subject to our full conditions of trading, a copy of which is available on request. The placing of an order constitutes acceptance of the following terms and conditions.

- 1. In the event of damaged goods, short supply or non-delivery, notification must be made in writing within 24 hours of delivery
- 2. Growtivation reserve the right to make a handling, carriage and re-stocking charge on goods returned that were incorrectly ordered by the customer. Only unused goods in resaleable condition will be accepted.
- 3. All goods remain the property of Growtivation until full payment is received. In case of non-payment Growtivation shall be entitled to re-possess the goods.
- 4. Growtivation reserves the right to make changes to product specifications, descriptions and prices without
- 5. The information contained in this Product Guide replaces any previous information and all specifications and technical data appearing here must be used as guidelines, since they correspond to average values tested at laboratory. It is the responsibility of all users to satisfy themselves that the data and information is current. All information and data contained herein is given in good faith and does not offer any warranty (express or implied) regarding the suitability of any product for your use as site conditions and requirements can vary.
- 6. Growtivation cannot accept responsibility for any loss, damage or injury that may occur directly or indirectly through the use of their products.

FLOWER BORDERS

FIND OUT MORE AT www.weedtex.co.uk

A standard duty weed control fabric offering very effective weed suppression for many different applications. WEEDTEX allows nutrients (including liquid feed and fertilisers), water and air into the soil to maintain its goodness and promote plant growth, whilst preventing weeds getting the daylight they need to grow. WEEDTEX is ideal for use as a weed suppressant beneath garden decking and decorative borders. It is recommended that a heavier duty fabric is used beneath aggregates/stone or areas subject to pedestrian traffic.

For effective weed suppression beneath garden decking install a layer of WEEDTEX, secure with **EXTRAFIX Plastic Pegs and cover** with bark (50mm minimum).

FIND OUT MORE AT www.landtex.co.uk

A thicker version of the WEEDTEX membrane, providing superior weed control in most types of landscape project. LANDTEX is an eco-friendly weed control solution as it effectively suppresses weeds without the use of chemicals. LANDTEX allows nutrients (including liquid feed and fertilisers), water and air to permeate creating a healthy and fertile soil, whilst preventing weeds getting the light they need to grow. LANDTEX is ideal for use as a weed suppressant in planting schemes as it can be easily cut without fraying, for planting through. LANDTEX should then be covered with a 50mm layer of bark or other mulch or rounded cobbles/decorative stone. It is recommended that a heavier duty fabric is used beneath sharp/angular aggregates/stone or areas subject to pedestrian traffic.

Cover LANDTEX with a minimum 50mm layer of bark or other mulch or rounded cobbles / decorative stone (non-trafficked areas only)

Planting through LANDTEX is easy with no fraying when a slit is cut. —

GROUNDWORKS

A good 'all round' or multi-purpose geo fabric that can be used for weed suppression and ground stabilisation in both soft and hard landscaping schemes. GROUNDTEX is a tough woven fabric which successfully meets the requirements for use above ground as a heavy duty weed barrier. Due to its excellent strength and tear resistance, GROUNDTEX can also be used below ground as a stabilising and separating geotextile in groundwork and civil engineering applications. GROUNDTEX

can be used beneath MOT Type 1 or 3 aggregate, sharp/angular stone and gravel including areas subject to pedestrian or vehicular traffic.

Lay GROUNDTEX Woven Geo Fabric beneath the sub-base to form a stable and level patio area.

FIND OUT MORE AT www.draintex.uk.com

A standard duty, non-woven geotextile fabric with excellent drainage and filtration properties. DRAINTEX has a stable but open structure making it ideal for lining trenches when constructing land (French) drains. DRAINTEX acts as a filter membrane, separating the aggregate from the soil, thus preventing the aggregate from mixing with the soil and reducing the efficiency and capacity of the drain.

DRAINTEX is also used for wrapping soakaway and water attenuation crates in both small domestic and large commercial projects. Again the high permeability of the fabric, means water can percolate through whilst preventing the soakaway becoming 'silted' up. DRAINTEX can be used as a ground stabilisation membrane beneath MOT Type 1 or 3 aggregate or hardcore to form a stable base in many hard landscaping and civil engineering applications.

For a successful soakaway, wrap the crates in DRAINTEX before covering with pea shingle.

DRIVEWAYS

ROADS

DRAINAGE

FIND OUT MORE AT www.drivetex.co.uk

A heavy duty, non-woven geotextile fabric providing the best performance in ground stabilisation, filtration and drainage. DRIVETEX is a professional driveway fabric, to be used beneath MOT Type 1 or 3 aggregate or hardcore in sub-base layers. This prevents sinking and rutting caused by settlement of aggregates into the soil beneath (sub-grade) – a process known as 'pumping'. This high quality product does not lose strength when used below ground, making it the 'number 1' choice for driveways, roads and other areas subject to vehicular traffic. DRIVETEX can be used for the construction of land (French) drains, for wrapping soakaway crates and for use beneath permeable paving and other SuDS compliant installations.

Without DRIVETEX aggregates mix with the sub-grade (soil) causing excessive settlement & rutting.

With DRIVETEX geotextile separates aggregate from the sub-grade (soil) and spreads the load imposed on the sub-base, thus preventing excessive settlement & rutting.

SEE PAGE 39 FOR POS SOLUTIONS

An extra heavy duty, non-woven geotextile with superior durability and mechanical resistance, providing ultimate performance in separation, filtration, drainage and reinforcement. EARTHWORX NW1000 is a quality geotextile fabric, manufactured from 100% polypropylene fibres to a high specification, which makes it suitable for demanding civil engineering projects particularly those with areas subject to a large volume of vehicular traffic and large imposed loads. This geotextile membrane prevents the sub-grade (soil) and sub-base (MOT Type 1 or similar) layers from mixing, which leads to contamination of the stone sub-base resulting in sinking and rutting of the surface. EARTHWORX NW1000 is widely used for roads, highways, car parks, railway construction, foundations and retaining structures.

EARTHWORX NW1000 can also be used as a drainage and separation layer in the construction of horse arenas, subject to the joints being correctly stitched or bonded.

Install EARTHWORX NW1000

between sub-base and sub-grade layers to prevent intermixing and create a stable base.

GROUNDCELL

Earthworx Groundcell provides erosion control on slopes and embankments, to protect, reinforce and stabilise the soil and promote growth. The honeycomb cell structure prevents irregular settlement and washout of contents. Groundcell is also used extensively for tree root protection where it is necessary to build an access road or area subject to traffic over ground containing tree roots. The cell structure creates a sub-base above the surface and spreads the imposed load, helping to prevent damage to the roots, whilst providing a stable and solid base.

J FIXING PIN

Earthworx J Fixing Pins are designed to fully secure Earthworx Groundcell panels for effective tree root protection and erosion control on slopes and embankments

DAMP PROOF MEMBRANE

A BBA approved durable polythene for water ingress prevention. Available in 1000g or 1200g in maxi rolls or mini packs.

The mini packs have many advantages, including;

- Saves time cutting off the roll = convenient
- No wastage and useless offcuts
- Easy to store and display
- Eye catching packaging improves sales
- Ideal for smaller DIY users

VAPOUR MEMBRANE

Green polythene membrane for use as a vapour control layer. Ideal for timber frame buildings and structures.

CONCRETE & SCREED FIBRES

20mm polypropylene fibres to minimise shrinkage and cracking in concrete and screed mixes. Available in 100g or 900g pre-packed sizes for the smaller user.

PLASTER & RENDER FIBRES

3mm polypropylene monofilament fibres to be used in plaster and render mixes to minimise shrinkage and cracking. Available in 200g pre-packed sizes.

A high quality woven fabric for use as a ground cover in horticultural and agricultural growing applications.

GROUNDTEX Ground Cover Fabric is UV stabilised meaning it can be used above ground to suppress weeds in 'standing out' areas or between beds, without further protection. This hard wearing fabric can also be used in covered areas such as glasshouses or polytunnels.

GROUNDTEX Ground Cover Fabric allows moisture to pass through it and helps to increase soil temperatures slightly, promoting healthy plant/crop growth whilst blocking the light that weeds need to grow. Available in roll sizes ranging from 1 metre to 5 metres wide.

Lay GROUNDTEX Ground Cover Fabric weed growth. __

BUCKLE TIES

Buckle Ties are a very popular tree tying method. Made of strong PVC to give a heavy duty and durable tie. Each Buckle Tie comes with it's own spacer.

SUPER SOFT TIES

These soft rubber ties prevent damage to the tree. No extra pads are required as these self interlocking ties form their own spacer between tree and stake.

SPIRAL GUARDS

Spiral guards give young trees vital protection against rabbits and sheep. They are economical and easy to fit, and stretch as the tree grows.

At Growtivation we believe in the concept that it's not products that sell, it's 'brands that sell'. Whilst a poor quality product will not make a good name for itself, when you combine the factors of high quality, functionality and a strong identity, you have a recognised brand that is sought after and popular with professional tradesmen and consumers. Growtivation's distinctly branded products pave the way to increased sales for our distributors.

All our products have clear, individual branding which is particularly emphasised on the product packaging. Brand names are memorable and help to describe the product's applications, whilst making it easy for the end user to identify.

What's more, at Growtivation we don't believe in delivering the goods and then leaving our stockists' to do the hard work. The 'point of sale' or 'impulse buy' theory is a well proven method of improving sales in a retail shop or trade counter environment. The sales results from a properly displayed product can be tremendous. See pages 41-43 for the display and literature options available.

POINT OF SALE DISPLAY BOX

A unique way to display these unique products. This re-fillable, eye catching, branded cardboard POS display box has been proven to boost sales results. These boxes can be used to display both the EARTHWORX Gravelrings and Grassrings panels and includes a leaflet dispenser for the popular 'Ground Control That Works' trade brochure. These boxes are supplied free* with initial orders for these products.

'GROUND CONTROL THAT WORKS' TRADE BROCHURE

Another 'end user' brochure with technical data and installation guidelines for the EARTHWORX Gravelrings and Grassrings products. There is provision on the reverse of the brochure for the branch contact details. These brochures fit into the leaflet dispenser on the front of the POS Display Boxes and are supplied FOC with these boxes or on specific request at time of order.

COUNTER DISPLAY UNIT

A compact cardboard display unit that fits easily on your counter or shelving units. This effective display holds a small piece of an Earthworx Gravelrings tile and some suitable gravel, showcasing the unique features of this system in action. Includes a leaflet dispenser for the 'Ground Control That Works' Trade brochure. These units are supplied FOC on request*.

POINT OF SALE DISPLAY BOXES

A tough, re-usable, high impact cardboard POS display box with brand specific attention grabbing graphics. These boxes can be used to display plastic fixing pegs, mini rolls, mini packs, contractor packs and some midi roll sizes in all of our geo fabric ranges. These boxes are supplied free* with initial orders for these products.

'LANDSCAPING THAT WORKS' TRADE BROCHURE

A comprehensive leaflet for the 'end user' containing product and installation guidelines covering our complete geo fabric range. There is provision on the reverse of the brochure for the distributor's contact details. These brochures fit into the leaflet dispenser on the front of the POS Display Boxes and are supplied FOC with these boxes or on specific request at time of order.
